Psychological Aspects of Functioning, Disability, and Health

David B. Peterson, PhD

"Peterson is the most qualified individual in the field of rehabilitation counseling and rehabilitation

psychology to write this text. He thoroughly understands the ICF as a model with great utility for the field of rehabilitation counseling."

-David A. Rosenthal, PhD, CRC
Chairperson, Department of Rehabilitation Psychology and Special Education
University of Wisconsin-Madison

"Has significance for assisting in the needed universal conceptual framework for improving public policy and service delivery systems for individuals with mental health-related issues."

-Susanne Bruyere, PhD
Cornell University

This textbook focuses on psychopathology as classified in the *DSM-IV-TR*, and discusses how it can be integrated into the ICF to assist mental health professionals while diagnosing and treating people with mental disorders. A perfect reference for students, the book serves as a natural bridge between the *DSM-IV-TR* and the ICF.

Students will learn the utility of using the ICF's biopsychosocial approach for conceptualizing mental health functioning (body functions and structures), disability (activity limitations and participation restrictions), and contextual factors (environmental and personal factors). The ICF's collaborative approach presents students with a conceptual framework that guides the selection of appropriate interventions and informs the evaluation of treatment efficacy.

July 2010 | 248 pp | Hardcover |

978-0-8261-2344-2 | \$65.00

Key Features:

- Develops knowledge and understanding of mental health functioning and disability based on the ICF and related diagnoses within the *DSM-IV-TR*
- Applies the ICF conceptual framework to planning mental health assessment and related interventions, and evaluating treatment outcomes
- Integrates diagnostic information from the *DSM-IV-TR* with the ICF's classification of functioning, disability, and health

Medical Aspects of Disability

A Handbook for the Rehabilitation Professional, Fourth Edition

Steven Flanagan, MD
Herb R. Zaretsky, PhD
Alex Moroz, MD, FACP, Editors

"Like its predecessor, the book remains one of the best sources of rehabilitation practice preparation for students and the most enlightened guide for rehabilitation professionals."

-Nan Zhang Hampton, PhD, CRC
Department of Counseling and School Psychology, University of Massachusetts

Medical Aspects of Disability has continually been the go-to resource for health care professionals, educators, and students. Now in its fourth edition, this landmark volume has been substantially revised, updated, and expanded—comprehensively describing aspects of disability pertaining to medical conditions commonly encountered in rehabilitation settings.

This edition discusses important topics that have come to the forefront of medical rehabilitation and disability, covering disabling conditions and disorders not only from clinical but also functional and psychological perspectives. Chapter authors, among the most widely respected authorities in their respective fields, provide comprehensive guides on what to expect and how to manage each medical issue, discussing the causative agents, classification, pain management, psychological factors, and much more.

July 2010 | 784 pp | Hardcover |

978-0-8261-2783-9 | \$95.00

Emerging Topics Discussed:

- Social work in physical medicine
- The information revolution, disability, and assistive technology
- Complementary and alternative medicine
