Spring 2020 | Paperback
9780826177070 | $99.00

Prepare your students with the foundation to become confident prescribers. This text provides core principles of organ function that help students understand the rationale for clinical reasoning and diagnostic testing in different disease states. It also offers critical information on the cellular basis underlying pharmacodynamics with the objective of providing the pathophysiological foundation needed to be an informed prescriber for patients across the lifespan.

**Advanced Health Assessment and Differential Diagnosis**
*Advanced Health Assessment and Differential Diagnosis*
Karen M. Myrick, DNP, APRN, FNP-BC, ANP-BC
Laima Karosas, PhD, APRN, FNP-BC, ANP-BC
October 2019 | Paperback
9780826162496 | $90.00

A streamlined and highly accessible approach to address all elements of holistic assessment and diagnosis in each body system. Loaded with photos and figures, this text provides visual guidance on the recognition and assessment of normal and abnormal findings. Each chapter delivers in-depth differential diagnosis guidance in table and algorithmic format and addresses pediatric, pregnant, elderly, disabled, veteran, transgendered, and elite-athlete populations.

**Advanced Pharmacology for Prescribers**
*Advanced Pharmacology for Prescribers*
Luu Haas
Spring 2020 | Paperback
9780826195463 | $110.00

This evidence-based pharmacotherapy text with a prescribing focus guides the student in analyzing pharmacological principles of relevant drug therapy. It will help the student to develop the clinical decision-making skills necessary to determine the most appropriate drug for optimal patient outcomes at every stage of the lifespan, particularly for patients with complex co-morbidities.
