For more than 25 years, Demos Medical Publishing has served the information needs of medical professionals. We publish high-quality books and digital products for physicians and other healthcare providers, and have established an international reputation for excellence in our core areas of neurology, physical medicine and rehabilitation, pathology, and oncology.

At Demos Health, we strive to publish books and information that will lead readers to better health. We provide top content from experts in their fields and offer insight to those who want to live well with disabilities or chronic illness, provide informed support for loved ones with health concerns, and improve their daily lives with smart approaches to diet and fitness.
NURSING

New & Forthcoming

Fast Facts for the Curriculum Development in Nursing, 2nd Edition
How to Develop & Evaluate Educational Programs in a Nutshell
Marion G. Anema, PhD, RN
Jan L. McCoy, PhD, RN

This is a concise step-by-step guide for novice nurse educators on the development of new programs and curricula or the revision of existing ones that meet the standards of the National Council of State Boards of Nursing, the CNEA, the ACEN, and the CCNE. The second edition of this quick-access guide is updated to meet all new and revised standards for program approval and covers the full scope of the development process from conception through evaluation.

Cardiac Diagnosis for Acute Care
The NP’s and PA’s Guide to a Comprehensive History and Deciphering the Differential
Leslie Janik, MSN, ARNP, ACNP-BC

Written specifically for both the nurse and experienced cardiovascular clinician in acute care settings, this is the only resource to focus on the art of conducting an in-depth patient history. Quite often, a patient will tell their first provider one thing, and their second provider something else, even when asked the exact same question. If recorded and interpreted correctly, a clinician can use a comprehensive history alone to obtain a correct diagnosis without exhaustive and expensive evaluations.

A Guide to Disseminating Your DNP Project
Marilyn Smith-Stoner, PhD, MSN, RN

A Guide to Disseminating Your DNP Project provides students with guidance to translate their work into other mediums. The book provides a basic path for all students covering decision on a dissemination method, identification of unique contributions and available tools, working on the project, approval processes and revisions, and utilizing the skills gained in disseminating the DNP Project to further career. Example dissemination projects are provided, as are case studies of students who had successful and unsuccessful experiences translating their DNP Project into another medium. Separate companion faculty guide available.

## Middle Range Theory for Nursing, Fourth Edition

Mary Jane Smith, PhD, RN, FAAN  
Patricia Liehr, PhD, RN

The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With five additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice. Additional content for DNP programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness.

## Nursing Research Critique
**A Guide to Excellence**
Karen Bauce, DNP, RN, MPA, NEA-BC  
Joyce J. Fitzpatrick, PhD, MBA, RN, FAAN

This is the first resource to provide APRN students and practicing clinicians with a step-by-step guide to critically analyze evidence from research studies. As part of a profession that relies on best evidence, nurses need to be able to effectively assess research articles. Equipped with these skills, nurses will lead an informed practice and improve patient care.

## Complementary and Alternative Therapies in Nursing, 8th Edition

Ruth Lindquist, PhD, RN, FAHA, FAAN  
Mariah Snyder, PhD, RN, FAAN  
Mary Frances Tracy, PhD, RN, CCNS, FAAN

The reorganized and expanded eighth edition of this highly acclaimed text continues to deliver innovative, practice guidelines for evidence-based complementary and alternative therapies that can easily be incorporated into curriculum and applied directly to practice. It describes holistic treatments that are culturally appropriate for clients across the lifespan and provides NCLEX-relevant content and content relevant for preparation of Advanced Practice Nurses.

## Fast Facts for the Operating Room Nurse, Second Edition
**An Orientation and Care Guide**
Theresa Criscitelli, EdD, RN, CNOR

With essential information needed daily to provide optimal care to every patient, the guide condenses volumes of operating room content into one pocket-sized companion. The second edition of this nursing mentor—for novice perioperative nurses in orientation and their preceptors—is newly updated to reflect the 2017 AORN guidelines with current, evidence-based clinical practice knowledge in an easy-to-use format. A well-organized text with evidence-based directives on current perioperative standards, this handy resource covers patient safety, the surgical environment, critical thinking, immediate decision-making, and perioperative skills.

Grant Writing Handbook for Nurses and Health Professionals, 3rd Edition
Barbara Holtzclaw, PhD, RN, FAAN
Carole Kenner, PhD, NNP, FAAN
Marlene Walden, PhD, APRN, NNP-BC, CCNS

This accessible, hands-on text, for new grant writers and seasoned health researchers, educators, and clinicians alike, illuminates the process of writing a persuasive request for funding from start to finish. Packed with practical tips for dealing with common pitfalls besieging grant seekers, the text progresses step-by-step from establishing the need for the grant through disseminating grant findings. This third edition is distinguished by key information about newer grant mechanisms and a fresh focus for foundation and corporate grants. It also includes updates on electronic submissions and web resources.

Academic Leadership in Nursing
Effective Strategies for Aspiring Faculty and Leaders
Leslie Neal-Boylan, PhD, RN, CRRN, APRN, FNP-BC
Chappy Sharon, PhD, RN, CNOR
Sharron E. Guillott, PhD, RN

This is the first resource to compare the experiences of nursing academic leaders among public, private, and for-profit institutions for nurse educators of all experience levels and ambitions. While most nursing faculty and administrators looking for new professional opportunities often use salary, geographic location, and even school reputation to inform their choice, the importance of culture and organizational structure cannot be overstated. The information and advice in this text addresses misconceptions and myths about all three types of organizations to enable readers to decide on and thrive in their chosen institution.

DNP Education, Practice, and Policy, Second Edition
Mastering the DNP Essentials for Advanced Nursing Practice
Stephanie Ahmed, DNP, FNP-BC, DPNAP
Linda Andrist, PhD, RN, WHNP-BC
Sheila Davis, DNP, ANP-BC, FAAN
Valerie Fuller, DNP, FNP-BC, FAAN
The second edition of this distinguished text—designed for use across the entire DNP curriculum—defines practice scholarship for the DNP-prepared professional nurse and promotes the development of key leadership skills needed to effectively influence healthcare policy and improve outcomes. Weaving the eight AACN DNP competencies throughout, the second edition clarifies, updates, and demonstrates their application. The text incorporates updates to the AACN’s 2015 position statement, The DNP: Current Issues and Clarifying Recommendations, and the Institute of Medicine’s The Future of Nursing report, and delivers new content from nationally recognized nurse leaders.

Virtual Simulation in Nursing Education
Randy M. Gordon, DNP, FNP-BC
Dee McGonigle, PhD, RN, CNE, FAAN, ANEF

Written for students in nurse educator programs, nursing faculty, and other health care educators, Virtual Simulation in Nursing Education unpacks the necessary tools for successful integration of technology into nursing programs. The benefits of virtual simulation in nursing education are numerable: less expensive, easier to access, and location independent compared to non-digital simulations. Yet, the evolving nature of both curricula and technology complicates the implementation of a coherent integration plan. Success requires a coordinated impetus from faculty, administrators and students to enrich a technologically enhanced learning landscape. With a practical, how-to focus, this book describes the unique dynamics and demands of using virtual simulation as a core teaching method and focuses on the best practices for integrating this technology into the nursing curriculum.

Caring Science, Mindful Practice, Second Edition
Implementing Watson’s Human Caring Theory
Kathleen Sitzman, PhD, RN, CNE, ANEF
Jean Watson, PhD, RN, AHN-BC, FAAN

Drawing on the contemplative and mindfulness teachings of Thich Nhat Hanh, the text offers an engaging entry into Human Caring Theory for newcomers and deepens understanding for current practitioners. Clear and simple content supports foundational learning and promotes direct experience related to Watson’s work. The book features guided mindfulness activities and artistic practices for each of the ten Caritas Processes, plus case studies and guided procedures to facilitate learning and internalizing the method. The text also serves as the foundational text for the WCSI online course that provides step-by-step instructions on how to integrate and ground the philosophy and abstracts of Human Caring Theory into practice.

Guided Participation in Pediatric Nursing Practice
Relationship-Based Teaching and Learning with Parents, Children, and Adolescents
Karen Pridham, PhD, RN, FAAN
Michele Schroeder, PhD, RN, CPNP
This authoritative publication delivers an in-depth examination of Guided Participation (GP), a dynamic process of teaching and learning that parents and guardians have used for generations to help their charges become self-reliant. GP is helping another person become competent by providing expertise working alongside the learner. For the nurse specifically, this means educating and working alongside parents and children within an environment that supports health.

Palliative Care Nursing, Fifth Edition
Quality Care to the End of Life
Marianne Matzo, PhD, APRN-CNP, AOCNP, FPCN, FAAN
Deborah Witt Sherman, PhD, ARNP, ANP-BC, ACHPN, FAAN
The 5th edition of this seminal reference and text in palliative care nursing helps the practitioner and student offer comprehensive, targeted interventions responsive to the needs of palliative and hospice patients and families. Based on the best level of evidence available, reference to clinical practice guidelines, and palliative care order sets to address critical symptoms, the knowledge presented in this edition supports compassionate, timely, appropriate and cost-effective care to achieve quality health outcomes for diverse palliative care populations across the illness trajectory. Noteworthy features of the new edition include broadening population health management by helping the reader to identify patterns and connections within and across population and utilize information to respond to the needs of populations.

Behavioral Pediatric Healthcare for Nurse Practitioners
A Growth and Developmental Approach to Intercepting Abnormal Behaviors
Donna Hallas, PhD, PPCNP-BC, CPNP, PMHS, FAANP

Written for practicing Pediatric and Family Nurse Practitioners, and PNP and FNP students, this pediatric primary care text expands upon the crucial role of the health care provider to assess, identify, and intercept potential behavioral health problems. Every parent wants to see their child become a socially and emotionally healthy adult, but this cannot be the outcome for every family. When children miss their milestones as anticipated, parents and the family dynamic is upset – parents question their parenting skills and their ability to raise a socially and emotionally healthy child. The content in this book is built upon strategic, evidence-based measures to evaluate and treat behavioral health during each well child visit across the pediatric lifespan and restore order to their patients and their families.

Introduction to Quality and Safety Education for Nurses, Second Edition
Core Competencies for Nursing Leadership and Management
Patricia Kelly, MSN, RN
Beth A. Vottero, PhD, RN, CNE
Carolyn Christie-McAuliffe, PhD, FNP

With contributions from nurses, physicians, pharmacists, librarians, attorney, and other health care professionals throughout the U.S. and beyond, Introduction to Quality and Safety Education for Nurses, Second Edition underscores the inter-professional focus grounding health care practice today. The updated edition includes five new chapters on implementing quality and safety initiatives from a leadership and management perspective, and state-of-the-art information on quality improvement. Each chapter contains learning objectives, opening scenarios, case studies, interviews, critical thinking exercises, key concepts, clinical discussion points, review activities, NCLEX-style questions, and web resources.

Intervention Research and Evidence-Based Quality Improvement, Second Edition
Designing, Conducting, Analyzing, and Funding
Bernadette Mazurek Melnyk, PhD, RN, CPNP/PMHNPC, FAAN
Dianne Morrison-Beedy, PhD, RN, WHNP, FNAP, AAANP, FAAN

Intervention research is the only type of research that enables researchers to draw conclusions about cause and effect relationship between an intervention and a specific outcome. Rather than simply collecting data, researchers using this method actually ‘does something’ to some but not all of the participants in the study. Researchers arrange (or follow) a systematic change in conditions to determine the effects.

Teaching with Technologies in Nursing and the Health Professions
Strategies for Engagement, Quality and Safety
Wanda Bonnel, PhD, GNP-BC, ANEF
Christine Hober, PhD, MSN, RN-BC, CNE
Katharine Smith, PhD, RN, ACNS-BC, CNE

Written for new and aspiring nursing faculty, this unique book delivers broad teaching principles alongside strategies for selecting the best technology. New generations of students are increasingly familiar with technology, and require educators who can add to their skills and shape them with a specific health care focus. Faculty have a responsibility to help their students prepare for the workforce, one that increasingly relies on high technology to operate. The teaching principles discussed in this text illuminate the changing technologies used in education and practice, and provide strategies for selecting the best technology to obtain a specific learning objectives, assignments, and outcomes.

Helen A. Carcio, MS, Med, ANP-BC
R. Mimi Secor, DNP, FNP-BC, NCMP, FAAN

This practical and user-friendly text-reference for clinical use in outline format provides clear and concise factual information related to the advanced health assessment of women. It provides an important resource for standard and advanced clinical skills needed by primary care providers, such as nurse practitioners (NPs), physician's assistants (PAs) and nurse midwives (CMNs), who provide care for women of all ages. The text provides guidance so that each practitioner may become more aware of when to practice independently, when to co-manage, when to consult, and when to refer.

Nursing Informatics for the Advanced Practice Nurse, Second Edition
Patient Safety, Quality, Outcomes, and Interprofessionalism
Susan McBride, PhD, RN-BC, CPHIMS
Mari Tietze, PhD, RN-BC, FHIMSS

In addition to being the only text to provide content designed for Advanced Practice Nurses, this text also presents a unique perspective, connecting all content to national standards. These standards, which represent federal and national healthcare initiatives, are designed to achieve safe, efficient quality of care through the use of technology. This text presents the skills necessary for nurses to use technology in an effective, cost-efficient, and meaningful way. The text also describes the function of the nurse working with interprofessional teams to improve patient safety and quality, through the deployment of successful health information technology implementation.

Care Coordination in the NICU
Implementing Family-Centered Nursing Care for Optimal Outcomes
Sara L. Mosher, RN, MSN, MHA

This book is intended to provide education, inspiration and support to providers within the perinatal/neonatal field so they can learn how to be emotionally supportive to not just their patients, but to the entire family unit in their patients’ lives. This book will broaden their perspective on the family experience and will focus on how NICU clinicians can communicate effectively and sensitively with families in crisis who are progressing through the various stages of the NICU experience.

Nurses Making Policy, Second Edition
From Bedside to Boardroom
Rebecca M. Patton, DNP, RN, CNOR, FAAN
Margarete L. Zalon, PhD, RN, ACNS-BC, FAAN
Ruth Ludwick, PhD, RN, CNS, FAAN

This text is written by “those in the know”, who are exceptional nurse leaders in practice, education, and politics. This immense contribution to this work provides a practical, “how-to” guide that is written to help advanced students and nurse leaders develop health policy skills to advocate for patients from the bedside to the larger political arena. Co-published with the American Nurses Association (ANA), the book examines the pivotal role of nurses’ involvement in health policy and describes the requisite steps for facilitating policy change, from understanding the political system through activating a plan and beyond.

Forensic Psychology 101
Linda Gomberg JD, PhD
This is a concise, engaging overview of forensic psychology, spanning its origins as a discipline through the many varied opportunities for employment today. In easy-to-understand language, the book describes federal and state legal systems as they interface with psychological constructs, and presents several chapters focusing on specific areas of the discipline, from criminal matters and ethical issues to family court and juvenile justice. The roles of the forensic psychologist and attorney in court proceedings are addressed and clarified, and landmark cases are highlighted to demonstrate key concepts and how forensic psychologists can influence the law.

The Handbook of Health Behavior Change, 5th Edition
Marisa E. Hilliard, PhD
Judith K. Ockene, PhD, MEd, MA
Lori Pbert, Ph.D.
Kristin A. Riekert, PhD
Applicable to a wide array of graduate level courses, including those with a focus on public health, preventive medicine, health psychology, and behavior change, this comprehensive new edition takes a broader, more pragmatic approach to describing the field of behavior change in relation to basic behavioral science, and provides empirically-based tools for successful intervention strategies

Grief Counseling and Grief Therapy, Fifth Edition
A Handbook for the Mental Health Practitioner
J. William Worden PhD, ABPP
Encompassing new content on the treatment of grief, loss, and bereavement, the updated and revised fifth edition of this gold-standard text continues to deliver the most current research and practical information for upper-level students and practitioners alike. New to the fifth edition are updates to the author’s Tasks and Mediators of Mourning, new case studies, and valuable Instructor Resources. The text highlights new initiatives to extend care to the bereaved and fosters the knowledge and skills required for effective intervention and even preventative treatment. Also addressed is the impact of social media and online resources for “cyber mourning,” changes in the DSM-5 as they influence bereavement work, alternate models of mourning, and new findings on the varied qualities of grief.

The PA’s Complete Guide to Prescribing Drug Therapy 2019
Mari J. Wirfs, PhD, MN, APRN, ANP-BC, FNP-BC, CNE
Thoughtfully organized for speedy retrieval of vital information, this prescribing reference is designed for use by PAs and other advanced health care providers in all clinical practice settings. Available in print with eBook and regular digital updates, it guides practitioners involved in the primary care management of patients with acute, episodic, and chronic health problems in selecting appropriate pharmacology options and treatment regimens for over 500 diagnoses.

Elder Abuse and the Public’s Health
Jeffrey E. Hall, PhD
Pamela B. Teaster, PhD
Encompassing the contributions of leading scholars in public health and gerontology, this is a rich repository of key ideas, concepts and issues regarding elder mistreatment and the role of public health initiatives in its prevention. The text frames elder mistreatment as a public health problem, stressing that efforts toward prevention is well within the scope of work performed by public health professionals.

Social Work Leaders Through History
Lives and Lessons
Jessica Gladden PhD, MSW, LMSW
Vividly portraying the personal and professional lives of social work luminaries from the 19th to the present century, this text links their groundbreaking contributions in social work to current CSWE core competencies. The book focuses on leaders who shaped the field across modern American history — the Progressive Era, the Great Society, the New Deal, the Postwar period, and others—and examines their lives in the context of the social and historical environment, their contributions to social work, and lessons from their experiences that are still relevant to social work today.

101 Careers in Counseling, Second Edition
Shannon Hodges PhD, LMHC, ACS
Fully updated, the second edition of this comprehensive, easy-to-use guide explores the wealth of diverse career opportunities in both traditional and non-traditional counseling settings. It provides up-to-date information on occupational outlooks, best and most challenging aspects of each job, and profiles of real-life counselors that provide insight into the core of the profession.

Certified Health Education Specialist Exam Study Guide
Dr. Elizabeth M. Felter, DrPH, MCHES
Dr. Jason Flatt, PhD, MCHES
This test preparatory guide serves as a primary go-to for the Certified Health Education Specialist (CHES) exam offered by the National Commission for Health Education Credentialing, Inc. The history and value of the CHES exams, requirements for sitting the exam, the process of applying for the examination, as well detailed schedules for the day of the test are provided. This guide book reviews the seven areas of competency that comprise the questions of the CHES exam. Within each chapter (one for each of the seven competency areas), a percentage of questions are indicated offering the student a sense of which areas to prioritize when studying. In each section sample questions with explanations and rationales are provided.

Strategic Planning for Health Professionals
Brian C. Martin, PhD, MBA
This hands-on text incorporates call-out boxes, real-world examples and case studies throughout so the content can be digested easily in undergraduate and graduate courses alike. Written by an experienced strategic planner and educator, and enhanced by practical applications and didactic prose, this foundational textbook prepares public health students, health care administration students and related health professionals to develop their own effective strategic plans that achieve performance excellence.

Trauma-Informed Approaches to Eating Disorders
Andrew Seubert NCC, LMHC
Pam Virdi, Med, RMN, CPN
Edited by noted specialists in eating and other behavioral health disorders, this book examines eating disorders from neurological, medical, nutritional, and psychological perspectives. Dedicated chapters address each treatment phase from a variety of orientations, ranging from EMDR and CBT to body-centered and creative therapies. The book also reveals the effectiveness of a multifaceted, phase model approach. Recognizing the potential pitfalls and traps of treatment and recovery, it also includes abundant psychoeducational tools for the client.

The Politics of a Majority-Minority Nation
Aging, Diversity, and Immigration
Fernando M. Torres-Gil, PhD
Jacqueline L. Angel, PhD
This timely and critical book takes on a new phenomenon facing the United States and poses the stark question: Will the United States be prepared by 2050, when its older population doubles and we become a majority-minority society? In the authors’ response, scholars, policy leaders and the public are provided with the background and information that connect these two trends to contemporary public policy debates. Written with clarity and expertise, this book illuminates the changes and challenges that face the nation by concisely addressing a wide range of topics, including immigration reform, the politics of aging, and health and retirement security, and provides a glimpse of how the “next America” might look.

Mindfulness-Based Hypnotherapy
The Basics for Clinical Practice
Gary R. Elkins, PhD, ABPP, ABPH
Nicholas Glentzki, MSCP
The complementary nature of mindfulness and hypnotherapy is well-established in the psychology and mental health communities, but this is the first book to present a cohesive conceptualization of mindfulness-based hypnotherapy practice. Written by a leader in the field of hypnosis and a mindfulness meditation expert, it provides practical instructions for integrating mindfulness and hypnotherapy to interested mental health professionals.

Anne L. Klee, PhD
Bret A. Moore, PsyD, ABPP
The Examination for Professional Practice in Psychology (EPPP) is typically the last hurdle between the transition from student to licensed or certified psychologist. Consisting of eight content areas (biological bases of behavior; cognitive-affective bases of behavior; social and cultural bases of behavior; growth and lifespan development; assessment and diagnosis; treatment, intervention, prevention and supervision; research methods and statistics; and ethical, legal and professional issues) the EPPP is a broad-based test that assesses the individual’s depth and breadth of knowledge of psychology.

Clinical Applications of Financial Therapy
Thomas E. Smith, PhD, MSW
Kristin V. Richards
Victoria M. Shelton
Pamela V. Valentine, MD, PhD, MSW
Grounded in popular evidence-based therapeutic interventions, this book guides the clinician in techniques for providing financial therapy to clients who need it. It provides an integrative model for working not just with individuals, but also with couples and families struggling with money challenges. The authors guide the reader in using existing personal finance resources along with interventions they may already be familiar with, such as CBT, to help their clients solve financial problems and gain financial literacy. The book will enable the clinician to provide financial coaching and eclectic approaches to financial counseling.

PM&R Board Review Flashcards (2-Box Set)
Rajat Mathur, MD
Developed to provide busy residents, fellows, and attendings with a proven method for on-the-go study, over 1,100 flashcards facilitate targeted review and retention of the core PM&R material you will be tested on. Cards are color-coded by topic area and contain a question or key concept on one side with the must-know information on the flip side. Flashcards aid academic recall and promote confidence through repetition and review so you’re ready for any high-stakes exam. Quiz yourself anytime, anywhere, and prepare to pass.

Essentials of Clinical Infectious Diseases, Second Edition
William F. Wright DO, MPH
Updated second edition of the concise but comprehensive handbook covering clinical infectious disease for students, residents, primary care medical providers, nurses, and PAs. Written in outline format with short, focused chapters, the book presents a systematic method for understanding basic mechanisms, establishing a diagnosis, and implementing appropriate treatment for commonly encountered problems.

Practical Surgical Pathology of the Breast
Juan P. Palazzo, MD
This comprehensive yet practical breast pathology book provides pathologists and pathology residents with the tools to navigate breast cases and classification systems that are commonly and uncommonly found in everyday practice. It includes topics that are particularly challenging and difficult to interpret—namely the understanding of molecular mechanisms that are linked to breast cancer and interpreting the significance of molecular tests.

Head and Neck Cancers
Evidence-Based Treatment
Athanassios Argiris, MD, FACP
Robert L. Ferris, MD, PhD
David I. Rosenthal, MD, FACR, FASTRO
Emphasizing the practice-changing techniques and the latest evidence-based treatment advances including targeted therapies, immunotherapy, transoral robotic surgery, and radiation therapy precision, this comprehensive yet accessible textbook is indispensable for any clinical oncologist of each discipline wanting a balanced and evidence-based reference on managing patients with head and neck malignancies.

Biostatistics for Oncologists
Kara-Lynne Leonard, MD, MS
Adam Sullivan, PhD
Biostatistics for Oncologists is the first practical guide providing the essential biostatistics concepts, oncology-specific examples, and applicable problem sets to medical oncologists, radiation oncologists, and surgical oncologists. This concise book is divided into three parts. It begins with chapters on general statistical concepts to provide the important background on navigating biostatistics as well as key information on summarizing and graphing data, sampling, and statistical estimation. The second part explains the most imperative topics for interpreting and analyzing oncologic data using examples and problem sets from the field so that oncologists and trainees can systematically practice calculating and analyzing data through statistical software furthering their study and understanding of key concepts.

Hematology Board Review
Blueprint Study Guide and Q&A
Francis P. Worden, MD
Rami N. Khoriaty, MD
Kathleen A. Cooney, MD
Michael Deininger, MD, PhD
For hematology and oncology fellows as well as practicing clinicians needing a refresher before taking MOC, this handy study guide which comes with a mobile-optimized App provides succinct overviews of all blood disorders, syndromes and diseases with practice questions on the go. Each disorder or disease-based chapter provides the same structure for ease of use beginning with the epidemiology, and followed by the etiology and risk factors, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. With 200 board style questions and answers with detailed rationales, Hematology Board Review is the go-to, quick review for any trainee preparing for initial certification and for hematologists or oncologists preparing for recertification.

New & Forthcoming

**Spinal Cord Medicine, Third Edition**  
*Steven Kirshblum, MD  
Vernon W. Lin, MD, PhD*

The Editors of the two leading texts on spinal cord injury (SCI) medicine have joined together in a unique collaboration to develop a single comprehensive, clinically focused book that will serve as the premier reference for professionals in the field. This new text draws on the expertise of both seasoned editors, along with experienced chapter authors as well as those who are poised to be future leaders, to bring together in one volume the most up-to-date medical, clinical, and rehabilitative knowledge in spinal cord injury care and treatment.

**Cancer Rehabilitation, Second Edition**  
*Principles and Practice*  
*Michael D. Stubblefield, MD*

Completely revised and updated new edition of the gold-standard reference on cancer rehabilitation. Authored by some of the world’s leading cancer rehabilitation experts and oncology specialists, the book provides a state-of-the-art overview of the principles of cancer care and details best practices for restoring function and quality of life to cancer survivors.

**Intraoperative Neurophysiology, Second Edition**  
*A Comprehensive Guide to Monitoring and Mapping*  
*Mirela V. Simon, MD*

Written by a team of experts from the premier Massachusetts General Hospital/Harvard Medical School IONM program, the book provides a step-by-step approach to monitoring and mapping for a wide variety of complex surgical procedures. Covering everything from set-up to troubleshooting and medical management, the authors present an integrated blueprint for choosing the right tests and customizing IONM procedures to the specifics of individual surgical procedures. Comprehensive in scope and filled with helpful illustrations, tables, and neurophysiologic recordings to aid interpretative understanding, this book continues to serve as a primary resource for physicians and technologists involved in monitoring to help reduce the operative risk of neurological damage in surgical patients.

**Artifacts in Clinical Neurophysiology**  
*William O. Tatum, IV, DO*

A unique visual reference that catalogs the wide range of artifacts commonly encountered in clinical neurophysiologic testing and builds skills and confidence in distinguishing artifact from true abnormality in interpreting recordings.

**Home Exercise Programs for Musculoskeletal and Sports Injuries**  
*The Evidence-Based Guide for Practitioners*  
*Ian Wendel, DO  
Shounuck I. Patel, DO  
James Wyss, MD, MPT*

This evidence-based manual and electronic “wizard” for creating and printing downloadable patient handouts is intended for the busy practitioner in any medical specialty who prescribes exercise for musculoskeletal injuries and conditions.

New & Forthcoming

**Stronger After Stroke, 3rd Edition**  
*Your Roadmap to Recovery*  
*Peter G Levine*

Written for stroke survivors, their caregivers, and loved ones, Stronger After Stroke presents a new and more effective treatment philosophy that is startling in its simplicity: stroke survivors recover by using the same learning techniques that anyone uses to master anything. Incorporating the latest treatments, medications, and scientific thinking on recovery, the third edition of Stronger After Stroke is a field manual for stroke survivors to take charge and achieve the highest level of recovery.

**Androgen Deprivation Therapy, Second Edition**  
*An Essential Guide for Prostate Cancer Patients and Their Loved Ones*  
*Richard J. Wassersug, PhD  
Lauren M. Walker, PhD  
John W. Robinson, PhD, R Psych*

Updated to include the latest drugs and treatment protocols, Androgen Deprivation Therapy is the only guide written exclusively about the side effects of hormone therapy. Offering both the knowledge and encouragement to help men cope with ADT and increase the quality of life for prostate cancer patients and their loved ones, this easy-to-read workbook is packed with helpful advice from experts.
