Encyclopedia of Clinical Nursing will serve as a clinical reference for nurses by providing essential information on a broad array of topics including 13 specialty sections, covering approximately 300 clinical topics. Entries are organized in a structured format presenting a definition, description, and concise etiology of the clinical problem, nursing assessment, related problems, interventions, nursing management, and evaluation, as well as quality and safety considerations.

Evidence-Based Practice in Nursing Foundations, Skills, and Roles
Thomas L. Christenbery, PhD, RN, CNE

Provides nursing students a learning trajectory with sufficient Evidence-Based Practice (EBP) knowledge, skills, and scholarly development to instill both the confidence and passion to deliver the highest quality EBP care. The book’s unique systematic path to understanding and applying EBP is tremendously useful to students at any point along the academic nursing trajectory.

Health Policy and Advanced Practice Nursing, 2nd Edition
Impact and Implications
Kelly A. Goudreau, PhD, RN, ACNS-BC, FAAN
Mary C. Smolenski, EdD, MS, FNP, FAAN

The only book of its kind, this text offers a wealth of information about the role of all types of APRNs (NPs, CNSSs, CNMs, and CRNAs) in influencing the development and application of health care policy in a wide range of specialties. Featuring nine completely new chapters, the second edition delivers an invigorated focus on developing policy that advocates for vulnerable populations and discusses how the incorporation of interprofessional education has changed and will continue to alter health policy in the U.S. and internationally.

Florence Nightingale, Nursing, and Health Care Today
Lynn McDonald, PhD, LLD

This in-depth analysis of Nightingale’s legacy goes beyond established scholarship to examine her lesser known—and arguably even more important—writings beyond Notes on Nursing. The book demonstrates afresh her unparalleled and ongoing influence on professional nursing, on the core concepts of health, disease, and access to care as we understand them today. It introduces readers to the “real” Florence Nightingale—who pioneered evidence-based health care, campaigned for hospital safety, promoted economic opportunities for women, and mentored two generations of nursing leaders.
Recently Published

**Clinical Leadership for Physician Assistants and Nurse Practitioners**  
Michael Huckabee, PhD, PA-C  
With an emphasis on concrete application of leadership principles, this text highlights interprofessional communication and the skills associated with becoming an effective leader in a variety of health care settings. Thought-provoking case studies provide real-world application of concepts throughout the text. Useful exercises throughout the chapters and appendices bring further clarity to the theoretical topics examined in the book.

**Formulating a Differential Diagnosis for the Advanced Practice Provider, 2nd Edition**  
Julie C. Penick, PhD, DNP, MSN, FNP  
Jacqueline Rhoads, PhD, ACNP-BC, ANP-C, PMHNP-BC, CNL-C, FAANP  
This easy-access clinical guide to over 70 commonly seen symptoms, written for advanced practice provider (APP) students and new practitioners, describes a step-by-step process for obtaining a reliable patient history, choosing the appropriate physical exam, and using the patient history and physical exam findings to form a differential diagnosis. The second edition continues to include the case study approach, and is updated to incorporate 22 new symptoms along with contributions by a new editor, who is a leader in holistic health.

**Curriculum Development and Evaluation in Nursing Education, 4th Edition**  
Stephanie S. DeBoor, PhD, APRN, ACNS-BC, CCRN  
Sarah B. Keating, EdD, MPH, RN, C-PNP, FAAN  
Reorganized and updated to deliver practical guidelines for evidence-based curricular change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators.

**Frameworks for Advanced Nursing Practice and Research**  
Philosophies, Theories, Models, and Taxonomies  
Kristina Henry, DNP, NE-BC  
Lucretia Smith, PhD, RN, CDE  
Rose Utley, PhD, RN, CNE  
This resource illuminates the daunting task of understanding and applying philosophies, models, theories, and taxonomies in nursing practice and research at the masters or doctoral level. Distinguished by a unique organizational structure, the text is divided into two broad areas of practice/focus: individuals and families (Part II) and communities, populations, and systems (Part III). The frameworks in each area are organized conceptually into 17 chapters, many of which are interdisciplinary, thus not commonly found in nursing theory texts.

Guidelines for Nursing Excellence in the Care of Children, Youth, and Families 2nd Edition
Cecily Betz, PhD, RN, FAAN
Martha Craft-Rosenberg, PhD, RN, FAAN
Marilyn Krajicek, PhD, RN, FAAN
This distinguished title, substantially updated with current guidelines and research, delivers the most current evidence-based practice standards and their application. These guidelines, developed through systematic consensus-building led by the AAN’s Child, Adolescent, and Family Expert Panel, incorporates the wisdom of 17 professional nursing and healthcare organizations regarding the core elements of pediatric nursing excellence.

Nursing Knowledge and Theory Innovation, 2nd Edition
Advancing the Science of Practice
Pamela G. Reed, PhD, RN, FAAN
Neima B. Crawford Shearer, PhD, RN, FAAN
This esteemed text for graduate-level nursing students focuses on the science and philosophy of nursing knowledge development, with a special emphasis on theory as a tool in developing practice-relevant knowledge. It is distinguished by its focus on practical applications of theory for scholarly, evidence-based approaches. The second edition features important updates and a reorganization of information to better highlight the roles of theory and the major philosophical perspectives in knowledge development.

The New Nurse Educator, 2nd Edition
Mastering Academe
Deborah Dolan Hunt, PhD, RN
This unequalled resource guides novice nurse educators step-by-step through the challenging process of transitioning from service to academe. It comprehensively addresses not only the fundamentals of teaching, evaluation, and curriculum development, but also the entire spectrum of skills and duties required of the nurse educator. This second edition delivers two new chapters devoted to the hospital-based educator, global health issues, and the future of nursing education.

Simulation Scenarios for Nursing Educators, 3rd Edition
Making it Real
Suzanne Hetzel Campbell, PhD, RN, WHNP-BC, IBCLC
Karen Daley, PhD, RN
When employed as a substitute for real clinical time, simulation scenarios have proven effective in bridging the gap between theory and practice. Written by educators for educators, this book provides all the knowledge, skills, and tools needed to make simulation feasible, enjoyable, and meaningful for students. In this edition, there are 25 new chapters, 20 of them scenarios for all levels and specialties, and 11 of those representing interprofessional education and team training.

Clinical Radiology Modules
Theresa M. Campo, DNP, FNP-C, ENP-BC, FAANP
This text presents the tools and concepts of radiology basics, interpretation basics, comparison with other testing modalities, the rationale for when to use radiology as the first diagnostic step, and exploration and interpretation of chest, abdomen, extremity, and spinal plan radiographs.

Obstetric Triage and Emergency Care Protocols, 2nd Edition
Diane J. Angelini, EdD, CNM, FACNM, FAAN
Donna LaFontaine, MD, FACOG
With more women than ever seeking obstetric triage and emergency services in obstetric triage units, obstetric providers need to be aware of triage assessment and evaluation protocols. This prize-winning pocket guide, containing management guidelines for obstetric triage/emergency settings, delivers critical information on obstetrics, midwifery, emergency, and family care for both students and seasoned clinicians. As with the first edition, all of the newly revised chapters take a strong collaborative and interprofessional approach to clinical conditions in the obstetric triage setting.

**Law for Nurse Leaders, 2nd Edition**
Diana Ballard, JD, MBA, RN
Paula DiMeo Grant, BSN, MA, JD, RN
One of the most hotly discussed and debated areas of society today, health care law carries a host of legal and ethical complexities that nurses and providers must increasingly recognize and factor into their best decision making. This convenient and comprehensive reference, written by expert nurse attorneys, untangles the legal dilemmas often encountered in contemporary nursing practice, such as nursing malpractice/negligence and liability, risk management, corporate compliance, employment law, business law, and dispute resolution as they relate to health care law and nursing practice.

Self-Neglect in Older Adults
A Global, Evidence-Based Resource for Nurses and Other Healthcare Providers
Mary Rose Day DN, H.Dip. PHN, BSc, Dip, Mang, RPHN, RM
Geraldine McCarthy PhD, MSN, Med, DipN, RNYT, RGN, Fellow RCSI
Joyce J. Fitzpatrick PhD, MBA, RN, FAAN
This authoritative resource in provides nurses and healthcare professionals with a comprehensive overview and analysis of self-neglect in older adults. With an aging global population, self-neglect is emerging as a complex problem that crosses multiple disciplines of health and social care. Characterized by a harmful inattention to health and hygiene, self-neglect manifests in a variety of ways across the world that healthcare professionals need to be able to recognize and manage.

Genetics and Genomics in Nursing
Guidelines for Conducting a Risk Assessment
Quannetta T Edwards PhD, FNP-BC, WHNP-BC, FAANP
Ann Maradiegue PhD, MSN, FNP-BC, FAANP
In an age of personalized and precision medicine, genetic risk assessment has never been more important. Genetics and Genomics in Nursing begins with an overview of genetics and the science behind inheritance. Chapters then break down the processes that make up risk assessment, and walk the reader through data collection and review, identification and calculation of risk, and patient communication. Finally, the last section of this text discusses special populations and key facts nurses need to know about their risk assessment.

A New Era in Global Health
Nursing and the United Nations 2030 Agenda for Sustainable Development
William Rosa MS, RN, LMT, AHN-BC, AGPCNP-BC, CCRN-CMC

This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses’ contributions in furthering the Post-2015 Agenda of the United Nations regarding global health infrastructures, and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide. It is the first book to identify, validate, and promote nurses’ proactive and multidimensional work in furthering current transnational goals for advancing health on a global scale.

Designing and Teaching Online Courses in Nursing
Sally Kennedy PhD, APRN, FNP, CNE

Despite astronomical growth in the number of online nursing programs currently available, little support is provided for faculty on how to teach in that environment. While most assume that the knowledge and skills required for classroom teaching are readily translatable to teaching online, significant differences exist. Affordances provided by the online environment promote reflection and engaging with the content in a deep and meaningful way that factors in adult students’ strengths as self-directed, motivated, and goal-driven learners.

Outcome Assessment in Advanced Practice Nursing 4th Edition
Ruth M. Kleinpell PhD, RN-CS, FAAN, FAANP, FCCM

Written by expert practitioners, educators and researchers, this fourth edition continues to analyze the foundations of outcome assessment, provide guidelines for selecting assessment instruments and measuring results, discuss design and implementation challenges in outcomes assessment, and provide an unequalled wellspring of information that will help APRNs to increase their skill level and enhance their professional practice role.

Stroke Certification Study Guide for Nurses Q&A Review for Exam Success
Kathy Morrison MSN, RN, CRN, SCRN
Designed to prepare nurses for the multiple-choice format of the certification exam, questions are arranged in chapters correlating with the logical sequence and flow of the exam and reflect the number of questions in each exam category. Case studies facilitate the application of knowledge with various examples of common stroke patient situations. A complete practice exam with answers and detailed rationales enables stroke care nurses and advanced practice clinicians to ascertain their strengths and weaknesses. Appendices include a list of medications, national stroke guidelines, and neuroscience terms.

NCLEX-RN EXCEL, 2nd Edition
Test Success Through Unfolding Case Study Review
Ruth A. Wittmann-Price, PhD, RN, CNE, CHSE, ANEF
Frances H. Cornelius, PhD, MSN, RN-BC, CNE
Brenda Reap Thompson, MSN, RN, CNE
This ultimate NCLEX-RN® review book that “helps you think like a nurse” has been fully updated to incorporate the 2016 test plan. Including more complex case studies to reflect the difficulty of the exam, this comprehensive review encourages active learning to master the content. Each evolving case study is broken down into realistic clinical problems that students can solve only by using the critical thinking skills necessary for the NCLEX-RN exam. Interspersed with over 700 interactive questions and rationales, audio-based questions, and electronic learning resources, the case studies mimic real-life nursing situations and provide models to help students problem-solve when taking the actual test.

Medical-Surgical Nursing Test Success
An Unfolding Case Study Review
Karen K. Gittings, DNP, MSN, RN, CCRN
Ruth A. Wittmann-Price, PhD, RN, CNE, CHSE, ANEF
Rhonda M. Brogdon, DNP, MSN, MBA, RN
Frances H. Cornelius, PhD, MSN, RN-BC, CNE
This is a unique case study reference for students in the medical surgical nursing core course and a review/workbook for students about to embark on the NCLEX-RN exam. Unlike other reviews, the book embeds required information into compelling, unfolding case studies that evolve over time in order to promote active learning and facilitate knowledge retention.

Leadership and Management in Nursing Test Success
An Unfolding Case Study Review
Ruth A. Wittmann-Price, PhD, RN, CNE, CHSE, ANEF
Frances H. Cornelius, PhD, MSN, RN-BC, CNE
Based on an innovative, active learning paradigm, this course review for the Leadership and Management Nursing Skills NCLEX-RN features the use of unfolding case studies to thoroughly engage students while helping them to develop critical thinking and problem-solving skills. Unlike other content review books, this resource builds required content into compelling case scenarios that mimic situations in real-life practice. It features answers and rationales at the end of each chapter and includes 200 questions comprised of 150 multiple choice and 50 alternative NCLEX-RN style questions. The book is also infused with Web links and resources that will keep students engaged and further reinforce realistic decision-making.

Fundamentals of Nursing Test Success
An Unfolding Case Study Review
Ruth Wittmann-Price, PhD, CNS, RN, CNE
Frances H. Cornelius, PhD, MSN, RN-BC, CNE
Based on a philosophy of active learning, this innovative text uses unfolding case studies as a compelling vehicle for learning fundamental nursing content. Unlike traditional vignettes, these case studies evolve over time as real-life situations, better enabling students to develop the skills they need to problem solve, actively engage, and use critical thinking techniques in new situations. The unfolding case study method also assists in the development of skills that are important for nursing students about to embark on the NCLEX-RN. The text incorporates all types of NCLEX-style questions into the unfolding case studies to facilitate exam preparation.

Essentials of Correctional Nursing
Lorry Schoenly, PhD, RN, CCHP-RN
Catherine M. Knox, RN, MN, CCHP-RN
Essentials of Correctional Nursing was written and reviewed by experienced correctional nurses with thousands of hours of experience. American Nurses Association standards are woven throughout the text, which provide the information needed by nurses studying for certification exams in correctional nursing. The text will also be of value to nurses working in such settings as emergency departments, specialty clinics, hospitals, psychiatric treatment units, community health clinics, substance abuse treatment programs, and long-term care settings, where they may encounter patients who are currently or have previously been incarcerated.

Maternal-Child Nursing Test Success
An Unfolding Case Study Review
Ruth A. Wittmann-Price, PhD, RN, CNE, CHSE, ANEF
Frances H. Cornelius, PhD, MSN, RN-BC, CNE
Based on a philosophy of active learning, this innovative and refreshing study aid is designed to help students learn the fundamentals of maternal-child nursing through unfolding case studies. Nursing content is woven into vivid case vignettes that evolve over time, thus engaging students and helping them develop critical thinking and clinical decision-making skills. The text also serves as a comprehensive workbook for students preparing for the NCLEX-RN. It is the only maternal-child nursing review text to integrate content with practice and professional responsibilities to foster an engrossing real-world learning experience.

Watson Caring Institute

Global Advances in Human Caring Literacy
Jean Watson, PhD, RN, AHN-BC, FAAN
Susan Lee, PhD, RN, CNP
Patrick Palmieri, DHSc, EdS, MBA, MSN, RN, FACHE, FISQua, FAAN

This narrative-based work is the first to describe Human Caring Literacy from the perspective of caring scientists who “live the life” by incorporating the precepts of human caring into every aspect of their personal and professional lives. It demonstrates, for nursing students and experienced nurses in a variety of roles, the abundant ways in which Caring Science theory powerfully informs the lives of nursing deans and faculty, APRNs, administrators, and frontline clinicians in the United States and globally.

Watson’s Caring in the Digital World
A Guide for Caring when Interacting, Teaching, and Learning in Cyberspace
Jean Watson, PhD, RN, AHN-BC, FAAN
Kathleen Sitzman, PhD, RN, CNE, ANEF

This innovative text, built on the foundations of Watson’s Caring Science, demonstrates how nursing professionals can develop virtual relationships that encompass caring and understanding in professional, teaching/learning, and everyday cyber communications. It describes how caring and love can transcend distance, space, and time in our increasingly “virtual” world in order to preserve the basic fabric of humanity as we physically interact less and electronically interact more.

9780826161154
October 2016
$50.00
156 pp | Paperback
Transformative Nursing in the NICU
Trauma-Informed Age-Appropriate Care
Mary E. Coughlin, RN, MS, NNP
This innovative text for Neonatal Nurses and NICU clinicians introduces new, evidence-based care protocols proven to mitigate or reduce the profound morbidities and subsequent developmental challenges that afflict newborns in the NICU. The book reframes the concept of developmentally supportive care to trauma-informed, age-appropriate care of the hospitalized premature infant.

Caring in Nursing Classics
An Essential Resource
Marlaine C. Smith, PhD, RN, NEA-BC, FAAN
Marian C. Turkel, RN, PhD, NEA-BC, FAAN
Zane Robinson Wolf, PhD, RN, FAAN
This is a core resource for nursing educators and students at all levels who seek fundamental perspectives on the art and science of caring. The text comprises 37 classic book chapters and journal articles written by leaders in the field and illuminate the evolution of the caring paradigm—from its beginnings as a philosophical/ethical/theoretical guide to nursing, to implications for the future development of caring science.

Exploring Rituals in Nursing
Joining Art and Science
Zane Wolf, PhD, RN, FAAN
This text examines a variety of nursing rituals in the context of caring science and evidence-based practice and demonstrates how understanding and incorporation of such rituals can have a transformative effect on contemporary nursing practice. It is written for undergraduate and graduate students, and serves to integrate the liberal arts into nursing education as per AANCA’s New Essentials of Baccalaureate Education.
Healing Presence
The Essence of Nursing, Second Edition
JoEllen Goertz Koerner, RN, PhD, FAAN

In this new edition, JoEllen Koerner explores the intersection of scientific, creative, and spiritual ways of knowing that inform and inspire this “healing presence” in caregiver and patient. Revised, updated, and refocused, the book integrates traditional nursing practice with cutting-edge alternative and integrative medicine. The author expands our awareness of Allopathic and alternative ways of healing as rooted in Native Healing practices.

Assessing and Measuring Caring in Nursing and Health Science
Second Edition
Jean Watson, PhD, RN, AHN-BC, FAAN

This book provides all the essential research tools for assessing and measuring caring for those in the caring professions. Watson’s text is the only comprehensive and accessible collection of instruments for care measurement in clinical and educational nursing research. The measurements address quality of care, patient, client, and nurse perceptions of caring, and caring behaviors, abilities, and efficacy.

Nursing, Caring, and Complexity Science
For Human Environment Well-Being
Alice Ware Davidson, RN, Ph.D.
Marilyn A Ray, PhD, RN, CTN-A, FAAN
Marian C. Turkel, PhD, RN, NEA-BC, FAAN

This innovative volume explores nursing and complexity science, and investigates how they relate in research, education, and practice. The book examines best methods for using complex systems, with expert contributing authors drawn from nursing, sociology, informatics, and mathematics.

End of Life
Nursing Solutions for Death with Dignity
Lynn Keegan, PhD, RN, AHN-BC, FAAN
Carole Ann Drick, PhD, RN, TNS, TNSCP

This professional clinical guide presents nursing administrators and nurses in acute care agencies, nursing homes, hospice, and palliative care settings with detailed implementation strategies for accommodating dying persons and their loved ones as they make the transition from physical life.

The Nursing Fast Facts Series is a collection of comprehensive, quick-reference guides on many important topics and roles in the nursing field. These books deliver core content in a readable, understandable, and practice applicable way that is helpful for novices and experts alike.

**Fast Facts About the Gynecologic Exam 2nd Edition**
A Professional Guide for NPs, PAs, and Midwives, Second Edition
Heidi C. Fantasia, PhD, RN, WHNP-BC
R. Mimi Secor, DNP, FNP-BC, NCMP, FAANP
This newly updated, step-by-step guide to the key points of conducting the GYN exam addresses everything both busy nurse practitioners and NP students need to know, from basic procedures to high-level challenges. Part I breaks down the GYN exam into clinical parts, emphasizing strategies to decrease anxiety and minimize discomfort at every stage of the exam. Part II walks the caregiver through the exam for women at every stage of the life span, sexually abused women, obese women, and women who have undergone genital mutilation.

Psychology of Aging
A Biopsychosocial Perspective
Erin Woodhead
Brian Yochim, PhD, ABPP
This is the first graduate-level text that offers a comprehensive, in-depth chronicle of issues surrounding the psychology of aging emphasizing psychology, with a foundation in the biology, and an expansion into the sociological aspects of aging. The text is divided into three sections: biological underpinnings of aging, psychological components of aging, and social aspects of aging. Among the multitude of topics addressed are biological theories of aging, neuroimaging methods in aging research, neuroplasticity, cognitive reserve and cognitive interventions, a detailed overview of neurocognitive disorders in aging such as Alzheimer’s disease and Lewy body disease, relationships in aging, work vs. retirement, cultural issues in aging, and aging and the legal system, to name just a few critical topics.

School Consultation for Student Success
A Cognitive-Behavioral Approach
Jeffrey M. Warren, PhD
This text offers a research-grounded, cognitive-behavioral framework for delivering effective, targeted consultation in K-12 schools. Cognitive-behavioral consultation combines elements of cognitive theory to create a succinct, comprehensive model of consultation that aims to promote equitable educational opportunities for all students. Consultation, in addition to other complementary support services, are presented with strategies for promoting non-cognitive or “soft” skills in students, career and college readiness, and optimal learning environments.

Direct Practice Skills for Evidence-Based Social Work
A Strengths-Based Text and Workbook
Renée Bradford Garcia, MSW, LCSW
Elizabeth C. Pomeroy, PhD, LCSW
This workbook prepares social work students to competently work with clients in the helping relationship. It provides case examples and exercises to which students can apply their knowledge of direct practice skills to enhance their abilities to make accurate assessments and design intervention plans for clients as astute practitioners. It teaches a strengths-based method of working with individuals, children, and families—looking at their individual and environmental strengths, as well as gaps and needs that may require intervention.

Treating the Traumatized Child
A Step-by-Step Family Systems Approach
Scott P. Sells, PhD, LMFT, LCSW
Ellen Souder, MA, LPCC-S

This is the first book that addresses trauma treatment for child and adolescents using a Family Systems Trauma (FST) model which goes beyond individual therapy to include the child and their entire family. Co-written by a renowned family therapist who created the Parenting with Love and Limits® model, it delivers a research-based, step-by-step approach that incorporates the child’s immediate family along with their extended family to treat the traumatized child or adolescent.

EMDR Therapy and Mindfulness for Trauma-Focused Care
Stephen Dansiger, PsyD, MFT
Jamie Marich, PhD, LPCC-S, LICDC-CS, REAT, RMT

Based on the belief that mindfulness is a critical component in the delivery of EMDR, this innovative text integrates mindfulness-informed practice with EMDR therapy to create an effective new approach for healing trauma. Based on current evidence-based research, the book demonstrates—with clear, step-by-step guidelines—how clinicians can conceptualize and deliver trauma focused care in both mental health and addiction treatment. Infused with practical applications, the book provides clearly articulated and effective approaches that provide a concrete beginning, middle, and end of treatment planning.

Ethics for Counselors
Integrating Counseling and Psychology Standards
Pamela LiVecchi, PsyD
Silvia L. Mazzula, PhD

This is the first textbook to integrate both ACA and APA standards of ethics for programs spanning both counseling and psychology disciplines. It provides a clear, comprehensive review of ethical standards and guidelines by the ACA and APA and distills the essence of both to find common ground for counselors and psychologists to understand and engage in ethical decision-making. The text also clarifies legal requirements at state federal levels, and facilitates critical thinking regarding the complex intersections of legal requirements and ethics codes in a way that is easily understandable.

Annual Review of Gerontology and Geriatrics, Volume 38, 2018
Environments in an Aging Society: Autobiographical Perspectives in Environmental Gerontology
Habib Chaudhury, PhD
Frank Oswald, PhD

Following the tradition of critical, contemporary topics, the 2018 volume presents 16 well-recognized senior researchers and scholars, who have contributed to and shaped the growth of the field of environmental gerontology in the past decades, internationally. Their autobiographical perspective uniquely traces the growth and evolution of this field, and provide understanding of, and insights on the role of environments in an aging society on multiple levels including origins and development of this sub-field; how is the biography of each author linked to the development of the field; what are the contextual factors that influence the biographical-intellectual evolution; and potential implications from this perspective on an aging society at large.

Health, Illness, and Optimal Aging, 3rd Edition
Biological and Psychosocial Perspectives
Carolyn M. Aldwin, Ph.D.
Diane Fox Gilmer, Ph.D.
Heidi Igarashi, PhD
Michael R. Levenson, PhD

Uniquely bridging a gap in the gerontology literature between the biological and psychosocial aspects of aging, the second edition of this interdisciplinary text provides key updates on an abundance of cutting edge research, expands information on diversity issues in aging, and examines in greater depth the physiology of aging, theories of biological aging, and methodological issues.

The Psychology of Oppression
E.J.R. David, Ph.D.
Annie O. Derthick, PhD

Written in an engaging and relatable manner, this book reviews the psychological theories and research on the topic of oppression – its evolution, its various forms, and its consequences. Painful historical examples and modern-day occurrences of oppression including mass incarceration, LGBT and transgender issues, police brutality, immigration reform, anti-Muslim sentiments, and systemic racism are explored.

Functional Behavioral Assessment, Diagnosis, and Treatment, 3rd Edition
A Complete System for Education and Mental Health Settings
Ennio Cipani PhD
Featuring a highly interactive learning system, this popular text is noted for its exceptionally clear and thorough coverage of how to conduct a functional behavioral assessment (FBA), select a function-based classification of the problem, and design a function-based intervention that takes into consideration a replacement behavior. A wealth of case studies, many of which are drawn from the authors’ clinical experiences in educational and mental health settings, give readers a realistic look at applied behavioral analysis. This book better prepares readers to design effective treatment for problem behaviors in a variety of settings by providing them with a deeper understanding of the related environmental function prior to introducing assessment and treatment, making it an ideal text for advanced students, clinicians, and practitioners.

The Psychology of Happiness in the Modern World
A Social Psychological Approach
James B. Allen PhD
Written in a conversational style yet empirically grounded, this book reviews what we know about the science of happiness. It is the first text to closely examine the social psychological processes as well as individualistic approaches that affect happiness. It explores how our social, cultural, and economic environment, the personal choices we make, and our evolutionary heritage shape our happiness. Topics that are inherently interesting to students such as how income and unemployment, marriage, children, and relationships, health, work, religion, economic growth, and personal safety affect happiness, are reviewed.

Theories of Counseling and Psychotherapy
Individual and Relational Approaches
Robert Rocco Cottone, PhD
This book emphasizes “big picture” frameworks to conceptualize how major theories of counseling and psychotherapy operate and compare. This innovative new text presents theories using an “paradigm” framework: the organic-medical, psychological, systemic/relational, and social constructivist paradigms. Designed to be accessible and relevant to practice, the book enhances and reinforces learning with the inclusion of learning objectives, chapter summaries, applications of each theory in practice, and brief biographies of major theorists.

Jennifer Curry PhD
Amy Milsom DEd
Fully updated to serve the needs of school counselors in training, this remains the only text to present a comprehensive, developmental, and practical approach to preparing school counselors to conceptualize the career development and college-readiness needs of P-12 students. The second edition reflects the ASCA’s new Mindsets & Behaviors for Student Success, which focuses on college and career-readiness standards for all students, 2016 CACREP Standards, and the 2015 Every Student Succeeds Act. The text is uniquely grounded in developmental, ecosystemic, and career theories as a basis for career interventions.

**Solution Focused Narrative Therapy**
Linda Metcalf PhD, LPC-S, LMFT-S
This groundbreaking book is the first to provide a comprehensive model for effectively blending the two main postmodern brief therapy approaches: solution focused and narrative therapies. It harnesses the power of both models—the strengths-based, problem-solving approach of SFT and the value-honoring and re-descriptive approach of narrative therapy—to offer brief, effective help to clients that builds on their strengths and abilities to envision and craft preferred outcomes.

**Counseling Women Across the Lifespan**
Empowerment, Advocacy, and Intervention
Jill Schwarz, PhD, NCC
The first comprehensive text to focus specifically on counseling women and girls, provides a sweeping overview of female life span development and issues and offers a unique integration of prevention, advocacy, and interventions. With contributions from leading scholars and practitioners in diverse fields, it provides information, resources, and practical suggestions that counselors can use to help empower individual women and girls to live as their authentic selves, and to engage as effective collaborators in addressing societal inequities.

**EMDR Therapy**

**EMDR Therapy and Mindfulness for Trauma-Focused Care**  
*Jamie Marich PhD, LPCC-S, LICDC-CS, REAT, RMT, Stephen Dansiger PsyD, MFT*

Based on the belief that mindfulness is a critical component in the delivery of EMDR, this innovative text integrates mindfulness-informed practice with EMDR therapy to create an effective new approach for healing trauma. Based on current evidence-based research, the book demonstrates—with clear, step-by-step guidelines—how clinicians can conceptualize and deliver trauma focused care in both mental health and addiction treatment. Infused with practical applications, the book provides clearly articulated and effective approaches that provide a concrete beginning, middle, and end of treatment planning.

EMDR Therapy

Cultural Competence and Healing Culturally Based Trauma with EMDR Therapy
Innovative Strategies and Protocols
Mark Nickerson, LICSW

Underlining the importance of cultural competence, this groundbreaking book focuses on using EMDR therapy with specific populations, particularly those groups typically stigmatized, oppressed, or otherwise marginalized in society. Drawing on social psychology research and theory as well as social justice and social work principles, it delivers general protocols for EMDR intervention for recovery from the internalized effects of cultural mistreatment.

EMDR with First Responders
Models, Scripted Protocols, and Summary Sheets for Mental Health Interventions
Marilyn Luber, PhD

EMDR Therapy is a psychotherapy approach based on standard procedures and protocols. Using these standard procedures and protocols as its template, this book presents step-by-step scripts that enable new practitioners and seasoned EMDR clinicians, trainers, and consultants alike to incorporate EMDR Therapy into their case conceptualizations and treatment plans when working with first responders who have suffered acute stress injuries during man-made and natural disasters. This mini-book illuminates early intervention procedures for first responders and protective service workers who must assist populations in the aftermaths of catastrophic events. It includes information and summary sheets created specifically for different types of first responders including firefighters and EMS professionals, the police, and the military. It also includes an underground trauma protocol designed for trauma related to mining disasters, and a “Blind to Therapist Protocol.”

Andrew M. Leeds, PhD

The second edition of this acclaimed guide to EMDR theory and practice provides updated information regarding new evidence for its treatment efficacy and an in-depth presentation of state-of-the-art research on its mechanisms of action. The book delivers clear, concise treatment guidelines for students, practicing clinicians, supervisors, clinic directors, and hospital administrators involved in the treatment of those with PTSD, specific phobias, and panic disorder. For researchers conducting treatment outcome studies, it provides easy-to-access treatment guidelines and a comprehensive set of fidelity checklists for all aspects of EMDR therapy.

EMDR for Clinician Self-Care
Models, Scripted Protocols, and Summary Sheets for Mental Health Interventions
Marilyn Luber, PhD

EMDR Therapy is an integrative psychotherapy approach based on standard procedures and protocols. EMDR practitioners have been called upon, worldwide, to respond to traumatized populations in the aftermath of catastrophes both natural and manmade. As a result of working with these populations, therapists are often prone to vicarious traumatization, secondary stress disorder, and compassion fatigue. This book presents step-by-step scripts—using the standard procedures and protocols of EMDR Therapy as their template—that enable psychotherapists to practice self-care while treating traumatized populations.

EMDR Therapy for Schizophrenia and Other Psychoses
Paul William Miller, MD, DMH, MRCPSych

This groundbreaking resource is the first to apply EMDR therapy to individuals with schizophrenia and other psychotic disorders. Written by the recognized world leader in using EMDR therapy to treat psychoses, the book delivers state-of-the-art research on this topic. It demonstrates how EMDR therapy can be safely used to help individuals with schizophrenia and other psychoses by formulating these disorders within a trauma and dissociation model.

EMDR Therapy

Eye Movement Desensitization and Reprocessing (EMDR) Therapy Scripted Protocols and Summary Sheets

Treating Trauma- and Stressor-Related Conditions

Marilyn Luber, PhD

Also available on CD-ROM! Using EMDR Therapy’s standard procedures and protocols as its template, this book presents step-by-step scripts that enable new practitioners and seasoned EMDR clinicians, trainers, and consultants alike to incorporate EMDR Therapy into their case conceptualizations and treatment plans while working with patients who have issues related to trauma, and stressor-related conditions. This text covers the use of EMDR therapy with such conditions as reactive attachment disorder, PTSD, acute stress disorder, persistent complex bereavement disorder, traumatized patients with psychosis, trauma in emergency (911) telecommunicators, and compassion fatigue.

9780826131645 August 2015 $75.00 352 pp | Paperback

Eye Movement Desensitization and Reprocessing (EMDR) Therapy Scripted Protocols and Summary Sheets

Treating Anxiety, Obsessive-Compulsive, and Mood-Related Conditions

Marilyn Luber, PhD

Also available on CD-ROM! EMDR Therapy is a psychotherapy approach based on standard procedures and protocols. This book is an important resource that focuses on applying EMDR therapy to anxiety, obsessive-compulsive, and mood-related conditions using EMDR Therapy’s standard procedures and protocols as its template. The scripts distill the essence of the Standard EMDR Protocols and reinforce the specific parts, sequence, and language used to create an effective outcome.

An EMDR Therapy Primer, Second Edition

From Practicum to Practice

Barbara J. Hensley, EdD

This is a step-by-step overview of the foundations of EMDR Therapy presented in easily accessible, conversational language. It helps both new and experienced clinicians to maximize their preparation and skills in using EMDR safely, confidently, and effectively. The second edition is fully revised to reflect the evolution of EMDR to an integrative psychotherapeutic approach and is intended for use as a companion to Francine Shapiro’s seminal EMDR texts.

9780826194541 July 2015 $65.00 520 pp | Paperback

EMDR Toolbox

Theory and Treatment of Complex PTSD and Dissociation

James Knipe, PhD

This book is the first to bring together in one volume an overview of the principal issues in treatment of dissociative disorders in complex PTSD, and a description of the integration of specific EMDR-related interventions or “tools” with other psychotherapeutic treatments. These tools can significantly extend the therapeutic power of EMDR-related methods. Each intervention is examined in detail with accompanying transcripts illustrating the nuances and variations in how the intervention is applied. It is written by a highly esteemed EMDR scholar, trainer, international speaker, and author who is an EMDRIA-designated “Master Clinician.”

9780826171269 August 2014 $65.00 272 pp | Paperback

Treating Addictions With EMDR Therapy and the Stages of Change

Nancy J. Abel, LCSW, LADC

John M. O’Brien, PhD

This is the first book to integrate the Stages of Change Model with EMDR’s phases for successful treatment outcome. The book addresses the scope of problems relating to addiction, including relevant statistics and descriptions of substance and process addictions, and considers the connection between addiction and trauma. While focusing on the use of EMDR therapy in treating addictions, the book also considers traditional models for each stage of treatment so interventions can be individualized according to the needs of each client.

EMDR Therapy and Adjunct Approaches with Children
Complex Trauma, Attachment, and Dissociation
Ana M. Gomez, MC, LPC
This is the first book to provide a wide range of leading-edge, step-by-step strategies for clinicians using EMDR therapy and adjunct approaches with children with severe dysregulation of the affective system. Written by an author internationally known for her innovative work with children, the book offers developmentally appropriate and advanced tools for using EMDR therapy in treating children with complex trauma, attachment wounds, dissociative tendencies, and compromised social engagement. The book also presents the theoretical framework for case conceptualization in EMDR therapy and in the use of the Adaptive Information Processing model with children.

Eye Movement Desensitization and Reprocessing (EMDR) Scripted Protocols
Special Populations
Marilyn Luber, PhD
Also available on CD-ROM! This book outlines some of the basic elements of the 11-Step Standard Procedure of EMDR and the Standard Three-Pronged EMDR Protocol. Unlike other EMDR books, however, this book focuses on applying EMDR scripted protocols to special populations. Special populations discussed include children, adolescents, couples, and clients suffering from complex posttraumatic stress disorder, dissociative disorders, anxiety, addictive behaviors, and severe pain. This is a volume rich in wisdom and insight that every EMDR clinician working with special populations will need in his or her collection.

Neurobiological Foundations for EMDR Practice
Uri Bergmann, PhD
This volume introduces the most current research about the neural underpinnings of consciousness and EMDR (eye movement desensitization and reprocessing) in regard to attachment, traumatic stress, and dissociation. It is the first book to comprehensively integrate new findings in information processing, consciousness, traumatic disorders of information processing, chronic trauma and autoimmune compromises, and the implications of these data on the Adaptive Information Processing (AIP) model and EMDR treatment.

Integrating EMDR Into Your Practice
Liz Royle, MA, MBACP
Catherine Kerr, BSc(Hons), MBACP
The book offers practical guidance and strategies to avoid the common pitfalls of EMDR practice through the 8-phase protocol. Chapters include Frequently Asked Questions about subjects such as confidence and other “horror stories” that are often heard by EMDR therapists. The text proposes to guide those therapists into a safer way of working while encouraging them to access accredited training and supervision for their practice. The scope of the book is limited to EMDR practice with adults.

Healing the Heart of Trauma and Dissociation with EMDR and Ego State Therapy
Carol Forgash, LCSW, BCD
Margaret Copeley, MEd
The powerful benefits of EMDR in treating PTSD have been solidly validated. In this groundbreaking work nine master clinicians show how complex PTSD involving dissociation and other challenging diagnoses can be treated safely and effectively. They stress the careful preparation of clients for EMDR and the inclusion of ego state therapy to target the dissociated ego states that arise in response to severe and prolonged trauma.

EPPP Fundamentals
Review for the Examination for Professional Practice in Psychology
Anne L. Klee, PhD
Bret A. Moore, PsyD, ABPP
This authoritative guide to the EPPP provides an affordable, concise, and comprehensive review of core exam content and includes over 300 sample questions. The guide goes beyond merely “teaching the test” through rote memorization. Instead, it covers the eight content domains of the EPPP and their knowledge areas in a step-by-step, narrative, and review format. The book also includes contributions from the directors of top psychology training and internship programs in the United States. The combined approach of providing a comprehensive review from true content experts helps users gain the depth and breadth of knowledge required for passing the exam, and mirrors how doctoral-level courses are commonly taught.

LGBT Health
Meeting the Needs of Gender and Sexual Minorities
Dr. K. Nikki Barefoot, Psy.D.
K. Bryant Smalley, Ph.D., Psy.D.
Jacob C. Warren, Ph.D.
This book examines the health outcomes and risk factors that gender and sexual minority groups face while simultaneously providing evidence-based clinical recommendations and resources for meeting their health needs. Drawing from leading scholars and practitioners of LGBT health, this holistic, centralized text synthesizes epidemiologic, medical, psychological, sociological, and public health research related to the origins of, current state of, and ways to improve LGBT health.

 Jonas’ Introduction to the U.S. Health Care System, 8th Edition
Raymond L. Goldsteen, DrPH
Karen Goldsteen, PhD, MPH
Benjamin Goldsteen, MBA
This book provides a basic understanding of the美国 health care system, from its historical development to its current state, with a focus on key issues such as access to care, quality, and costs.

Certification

The Licensing Exam Review Guide in Nursing Home Administration, Seventh Edition
James E. Allen, PhD, MSPH, NHA, IP
The seventh edition of this classic review guide for nursing home administration licensure is revised and updated to reflect new information as recently mandated for the federally required national exam. It is based on the same format as the actual exam and provides an easy-to-use, effective way to review essential concepts and practice test-taking skills.

**Essentials of Clinical Radiation Oncology**  
Matthew C. Ward, MD  
Rahul D. Tendulkar, MD  
Gregory M. M. Videtic, MD, CM, FRCPC  
Essentials of Clinical Radiation Oncology is a user-friendly, clinical review book for radiation oncologists, residents, and radiotherapy team members. Each chapter provides essentials on epidemiology, risk factors, anatomy, pathology, genetics, screening, clinical presentation, workup, prognostic factors, staging, and treatment paradigms for each disease site. It walks through each treatment paradigm, notes the current standard of care and the evidence base for radiation therapy.

**Radiation Therapy Treatment Effects**  
An Evidence-based Guide to Managing Toxicity  
Bridget F. Koontz  
Radiation Therapy Treatment Effects is a practical guide to common and uncommon toxicities which occur related to radiation therapy. Organized by anatomic region, from CNS to skin and extremities, it concisely and comprehensively reviews the symptoms, timing, preventative measures, and treatment of acute, delayed, and chronic radiation toxicities and provides evidence-based recommendations for management of both early and late effects. This evidence-based handbook of radiation therapy side effects is an invaluable reference for the daily management of cancer patients and survivors.

Cancer Pharmacology and Pharmacotherapy Review Study Guide for Oncology Boards and MOC Exams

Anthony J. Perissinotti, PharmD, BCOP
Bernard L. Marini, PharmD
Francis P. Worden, MD

Cancer Pharmacology and Pharmacotherapy Review is the first book devoted entirely to providing the must-know facts on each cancer agent, including their pharmacokinetics, FDA-approved indications, toxicity, interactions, and other important information that is commonly found on board examinations and essential for any clinician or practitioner to review. The authors, an oncologist and two pharmacists, have developed a handy question-and-answer format to present the material in digestible bursts.

Physics in Radiation Oncology Self-Assessment Guide

Andrew Godley, PhD
Ping Xia, PhD

This companion to the Radiation Oncology Self-Assessment Guide is a comprehensive physics review for anyone in the field of radiation oncology looking to enhance their knowledge of medical physics. It covers in depth the principles of radiation physics as applied to radiation therapy along with their technical and clinical applications. To foster retention of key concepts and data, the resource utilizes a user-friendly “flash card” question and answer format with over 800 questions. The questions are supported by detailed answers and rationales along with reference citations for source information.

Syed Z. Ali, MD, FRCPath, FIAC
Derek B. Allison, MD
Ashley Cimino-Mathews, MD
Cheng-Ying Ho, MD, PhD
Doreen N. Palsgrove, MD
Christopher J. VandenBussche, MD, PhD

Atlas of Exfoliative Cytopathology with Histopathologic Correlations is a comprehensive reference for interpreting body cavity fluid, respiratory, and gastrointestinal exfoliative cytopathology specimens. Generously illustrated with over 500 high-resolution color images, this user-friendly Atlas guides the reader through common and unusual non-gynecologic and non-urinary exfoliative specimens to detect neoplastic and non-neoplastic disease.

**Atlas of Pulmonary Cytopathology**
With Histopathologic Correlations
Christopher J. VandenBussche, MD, PhD
Syed Z Ali, MD
Morgan L. Cowan, MD
Joyce E. Johnson, MD
Paul E. Wakely, Jr., MD

Atlas of Pulmonary Cytopathology: With Histopathologic Correlations offers concrete diagnostic guidance for anatomic pathologists to accurately identify pulmonary disease using exfoliative and fine needle aspiration techniques. It not only illustrates the classic cytomorphology of common lung lesions, but also presents and contrasts important problem areas that can lead to erroneous interpretation. Clearly and concisely written by leaders in the field, this volume is a practical desk reference for all facets of the diagnostically challenging areas of pulmonary cytopathology.

**Atlas of Touch Preparation Cytopathology**
Liron Pantanowitz, MD
Juan Xing, MD
Sara E. Monaco, MD

This visually-stunning book reviews touch preparations corresponding to all major body systems and includes chapters on specimen handling and processing, intraoperative use during frozen sections, as well as on ancillary testing using touch preps. While most cytopathology atlases have images of smears and fluids, they have very little discussion of touch preparations making this volume a one-of-a-kind resource.

**Atlas of Salivary Gland Cytopathology**
With Histopathologic Correlations
Christopher J. VandenBussche, MD, PhD
Justin Bishop, MD
Syed Z Ali, MD, FRCPath, FIAC
William C. Faquin, MD, PhD
Zahra Maleki, MD

This comprehensive diagnostic guide is for anatomic pathologists that accurately identifies salivary gland disease using fine needle aspiration (FNA). It not only illustrates the cytomorphology and histology of salivary gland specimens, but also presents and contrasts common problem areas that can lead to erroneous interpretation. The Atlas features more than 400 carefully selected high-resolution color images detailing critical aspects of salivary gland disease and illustrating patterns and diagnostic clues for non-neoplastic lesions, benign lesions, malignant neoplasms, and unusual neoplasms.

Physical Medicine and Rehabilitation Pocketpedia, 3rd Edition
Matthew Shatzer, DO
Howard Choi, MD

Designed for the busy clinician, this pocket-sized compendium is crammed with useful tables, charts, illustrations, and clinical tips and guidelines for effective patient care and restoration of function. Covering core topics in PM&R and field-tested in the clinic and at the bedside over two successful editions, this resource delivers the information practitioners need on a daily basis. The new third edition has been completely updated, expanded, and reorganized to include the latest evidence-based treatment recommendations and protocols.

Regenerative Treatments in Sports and Orthopedic Medicine
Gerard A. Malanga, MD
Victor Ibrahim, MD

Regenerative medicine offers physicians new tools to help repair damaged tissue, alleviate pain, accelerate healing, and improve function for patients with degenerative conditions or sports injuries. Regenerative Treatments in Sports and Orthopedic Medicine is the first comprehensive book devoted to orthobiologic treatments for orthopedic conditions. Authored by experts in regenerative medicine, this evidence- and experience-based guide is written for clinicians looking to understand and effectively implement these treatments in their practices.

Musculoskeletal Ultrasound Cross-Sectional Anatomy
John C. Cianca MD
Shounuck I. Patel DO

This spectacular cross-sectional Atlas is an indispensable tool for clinicians learning diagnostic ultrasound, as they can use the anatomical images for comparisons with their own scans. For the seasoned practitioner, the organized format with high-resolution examples makes this an essential reference for confirming exam findings. Multiple high resolution views of each structure are accompanied by original illustrations that document the structures in the sonograph and serve as a reference to decipher the image and foster understanding of anatomic relationships and ultrasound appearances.

Physical Medicine and Rehabilitation Board Review, 3rd Edition
Sara J. Cuccurullo, MD

Written in outline format for readability and easy access to information, content is modeled after the topic selection of the AAPMR Self-Directed Medical Knowledge Program used by residents nationwide. To aid in information retention, Pearls are designated with an open-book icon to highlight key concepts and stress clinical and board-eligible aspects of each topic. The text is divided into major subspecialty areas written by authors with clinical expertise in each subject area, and content is reviewed by senior specialists to ensure the utmost accuracy. More than 500 high-quality illustrations clarify and reinforce concepts. The book also provides updated epidemiologic and statistical data throughout and includes a section on biostatistics in physical medicine and rehabilitation. In addition to its proven value as a resource for exam preparation, the book is also a must-have for practicing physiatrists seeking recertification, and for PM&R instructors helping trainees to prepare for the exam.
